Champagne Lounge
In 1668, a young, blind, Bénédictine monk named Dom Pierre Perignon became the cellar master and chief accountant at the abbey d’Hautvillers. The Champenois abbeys had already earned a reputation for producing not only the best rose’s of the region but also a dubious local specialty: vin blanc mousseux.

Inspired by Dom Pierre Perignon, we have carefully selected an extensive collection of special wine and cocktails made it with this luxurious product.

Our sommelier will be glad to make a recommendation based on your predilections.

Champagne Large Format

It was not until the 17th century when glass bottles were developed for the storage and production of wine. Before that, the winemakers almost exclusively vinified wine in barrels and stored it in vats. To make it last longer, resin or sugar was often added to the wine - alternatively, it was diluted. It was only due to the development of glass bottles that wines as we know them today were produced. As of the 19th century, glass bottles became the most important container for wine because glass is chemically neutral. This wine, especially pronounced with the larger variations such as the magnum bottle.
